REPORT FORMS– All data can be easily accessed as and when needed, tailored into management reports in either excel or PDF formats.

Reports include:

- daily activity
- mileage
- odometer
- utilisation
- speed analysis

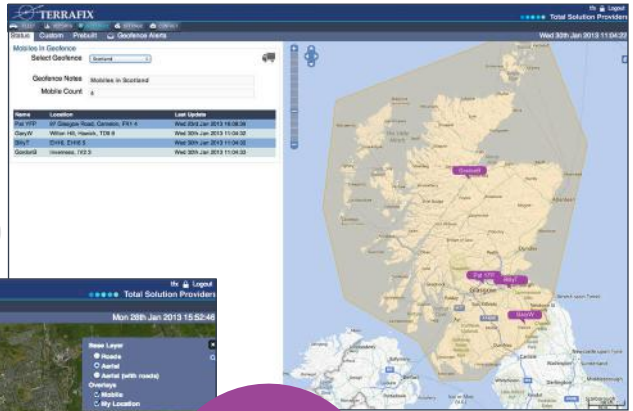

BENEFITS of TerraTRACK

- Asset management to improve business needs. The TerraTRACK can
- Increase productivity by reducing operating times
 - Improve security of the assets
 - Reduce operating costs
 - Real-time tracking
 - A range of inputs/outputs can be configured to offer the opportunity to add additional functionality i.e. messaging and emergency buttons

Email: terratracking@terrafix.co.uk

GEOFENCES– TerraTRACK benefits users with a Geofencing ability allowing the user to assign particular assets to certain areas. Geofences can be default shapes, user defined or from a prestored library.

Email alerts can also be set for expiry dates of MOT/tax/services

Customise reports to suit your business needs

JOURNEY PLAYBACKS– TerraTRACK allows the user to view historical data and journeys taken by the particular assets, displaying various journey statistics including direction of travel– average/max speed, time and distance, driver behaviour and a speed profile.
